1.2 Before Installation

- It is very important to locate the Rackmount Keyboard Drawer in a suitable environment.
- The surface for placing and un-boxing the Rackmount Keyboard Drawer should be stable and level or mounted into a suitable cabinet.
- Make sure the place has good ventilation, is out of direct sunlight, away from sources of excessive dust, dirt, heat, water, moisture and vibration.
- Convenience for connecting the Rackmount Keyboard Drawer to the related facilities should be well considers too.

1.3 Unpacking

The Rackmount Keyboard Drawer comes with the standard parts shown on the package contents. Check and make sure they are included and in good condition. If anything is missing, or damage, contact the supplier immediately.

1.6 Structure Diagram

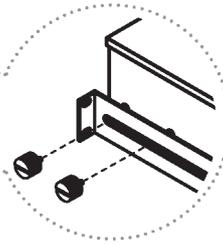

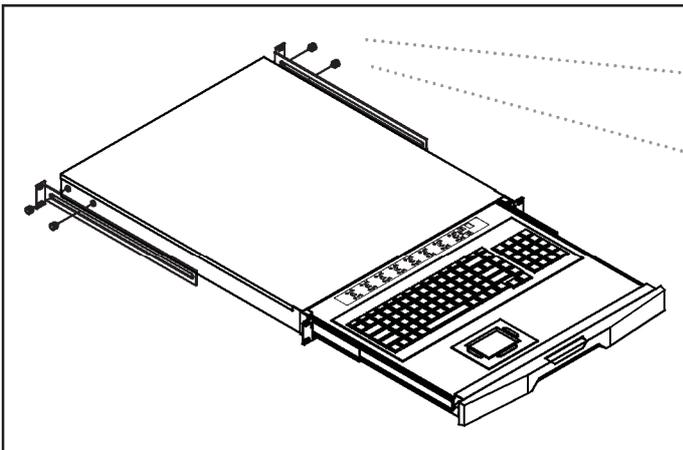

1 Adjustable rear mounting L-bracket

4 Mouse interchangeable module kit

2 Membrane switch (for KVM-RKD with KVM option)

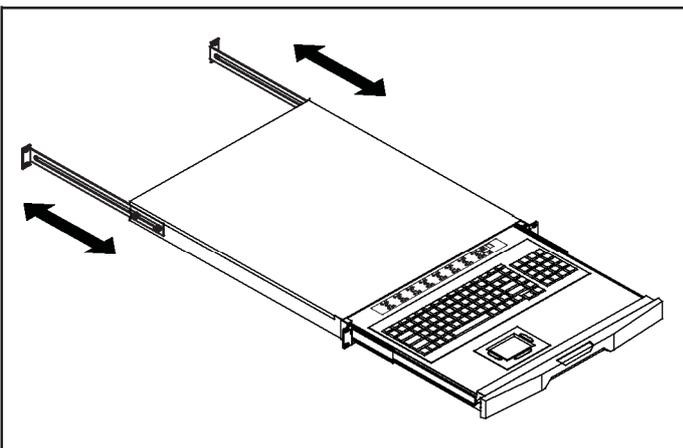

5 Carry handle to release the 2-pt lock

3 Keyboard interchangeable module kit

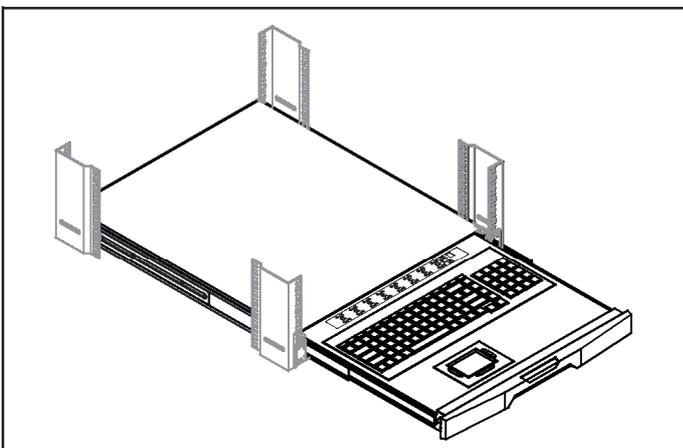

- Install each rear L-bracket using two fasteners shown in **Figure 1**.
- Leaving the fasteners slightly loose

Figure 1. Installing the rear L-bracket to the keyboard drawer.

- Measure the front and rear mounting depth of the rack.
- Align each rear L-bracket to a suitable length and tighten the fasteners shown in **Figure 2**.

Figure 2. Aligning the rear L-brackets to a suitable length for the rack.

- Fixed the keyboard drawer into the rack.
- * Hardware (screws and cage nuts) for fixing the mounting bracket to the rack is not provided.

Figure 3. Fixing the keyboard drawer into the rack.

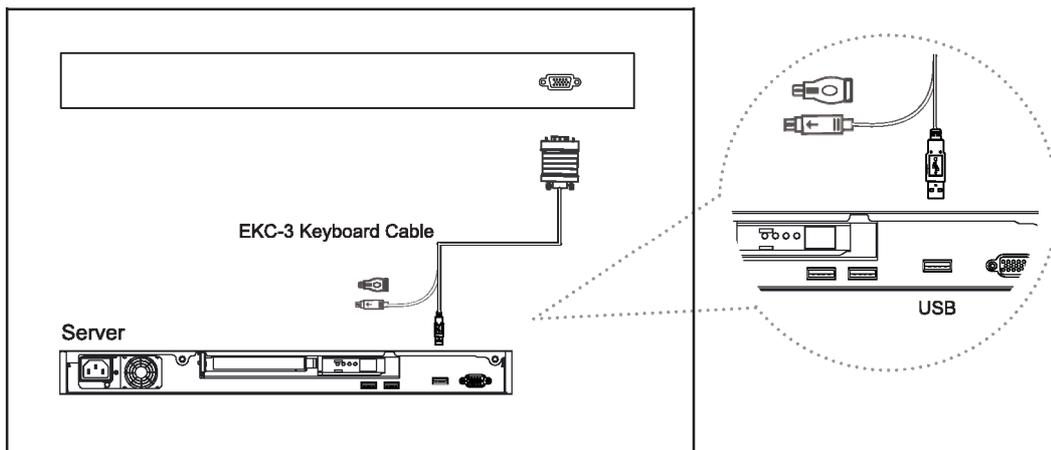

Figure 4. Example of connecting EKC-3 keyboard cable to server via USB interface

Remarks :

- The above connection is only for the keyboard without KVM switch built-in.
- For the keyboard drawer with KVM switch built-in, please refer to <http://www.kvmswitchtech.com>.

1.9 Connect to KVM via USB Interface

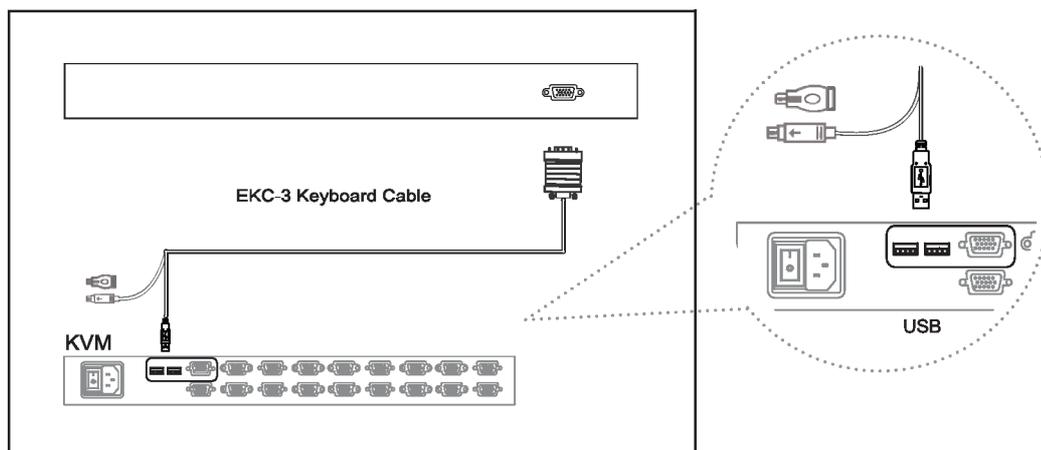

Figure 5. Example of connecting EKC-3 keyboard cable to KVM via USB interface

Caution : The keyboard drawer is hot-pluggable, but components of connected devices, such as the servers and KVM switch, may not be hot-pluggable. Plugging and unplugging cables while servers and KVM are powered on may cause irreversible damage to the servers, KVM and keyboard drawer. Before attempting to connect anything to the keyboard drawer, we suggest turning off the power to all devices before connecting them. Apply power to connected devices again only after the keyboard is receiving power. The company is not responsible for damage caused in this way.
