INTRODUCTION

This HDMI 1x2 Splitter can distribute (1) HDMI source signal to any (2) display devices. Supports video resolution up to 4K@30Hz 4:4:4. It is designed with (1) HDMI input, (1) HDMI loop output and (2) CAT outputs. The HDMI signal transmission distance can be extended up to 131 ft (40M) at the resolution of 4K30Hz, or 230 ft (70M) at 1080P@60Hz via a single CAT6 cable. The product supports one-way IR return and advanced EDID management. This product has a 3 year warranty.

NOTES

For the best results, it is suggested you use pure copper and not copper clad aluminum and use solid, riser rated cable and not stranded cable. Stranded cable has ~20% higher signal attenuation than solid, so its runs need to be shorter.

Contiguous cable runs are preferred. The use of network punch down into patch panels and keystone jacks adds attenuation and runs need to be shorter.

The use of EZ-45® connectors are not recommended as the cable extends outside the end of the RJ45 connector and can act as an inductor of noise.
